About Us...

Mud Australia is an Australian design company, founded in 1994 by Shelley Simpson. Each piece of Mud is entirely hand made at our studio from limoge and imperial porcelains and are designed to emphasise their natural lines and functionality. The porcelain itself is tinted at the slip stage, providing a depth of colour that cannot be achieved using surface glazing. A clear glaze is applied to the interior of each piece, leaving the exterior with a vitrified stone-like surface that becomes smooth with handling. Each piece of mud can be used in the oven, microwave & dishwasher, for baking and serving and from the oven to the table.
